

August 27, 2019

CARLE PLACE, NY (August 27th, 2019) – Orkal Industries LLC, a subsidiary of Future Metals LLC, today announced the signing of an exclusive, global distribution agreement with AdelWiggins, a division of Transdigm, Inc. The agreement includes all AdelWiggins’ proprietary heater products used for freeze protection on a broad range of commercial aircraft applications.

Orkal is a long-standing OEM distributor of AdelWiggins’ aerospace product lines. “We are proud to add AdelWiggins’ heater products for the commercial aftermarket to our product portfolio and excited to utilize the globally positioned sales team at Future Metals to support the requirements of Future Metals’ many airline and third-party MRO customers,” said Orkal President, Oren Schmidt.

###

About Orkal and Future Metals

Orkal is a distributor of highly specialized fluid conveyance products for aircraft and aircraft engine applications. The company serves aerospace OEM’s as well as Tier 1 and Tier 2 tube assembly manufacturers. Future Metals serves the global aerospace industry with tubing, extrusions, bar, and sheet products made from stainless steel, aluminum, titanium, and nickel alloys.

Orkal and Future Metals are part of the Aerospace Components Group of Marmon Holdings, a Berkshire Hathaway company. Marmon is a global industrial organization comprising 10 diverse business sectors and more than 100 autonomous manufacturing and service businesses with facilities in more than 20 countries. Marmon’s revenues exceeded \$8.1 billion in 2018.

About Transdigm AdelWiggins Group

AdelWiggins Group, a wholly owned subsidiary of Transdigm is a leading global design and manufacturer of high quality, custom designed fluid line components such as flexible connectors, quick disconnects, clamps, heaters and hoses, and lightning protection isolators. AdelWiggins’ technical expertise and responsiveness in developing, qualifying, and certifying innovative solutions have established AdelWiggins as an aerospace market leader.
